Who I Am

Curious by nature. Builder by choice.

I'm a Computer Engineering student at LFRP-ITR, Gandhinagar (KSV), currently in my 7th semester — passionate about software development and machine learning.

My journey spans real-time face recognition systems and full-stack gym management apps. I believe in learning by doing — every project sharpens my engineering instincts and prepares me for real-world challenges.

Actively seeking internship opportunities to contribute to impactful products and grow in a collaborative, technology-driven environment.

Quick Learner

Fast tech adoption & growth

Problem Solver

Analytical & creative thinking

Team Player

Collaborative & communicative

Hard Working

Dedicated & consistent effort

What I've Built

Real applications, real problems solved

DETECTION USING YOLO AND

EduSync

In Development

Face Recognition System

A real-time face recognition system using Python and OpenCV that detects and identifies individuals via live webcam. Includes a Flask admin dashboard for student registration, facial data management, and MySQL-backed profile & session storage.

- > Real-time webcam detection & identification
- > Flask admin dashboard with clean UI
- > MySQL – facial encodings & session logs
- > Future: full attendance management system

Python

OpenCV

Flask

MySQL

SCRFD

Iron Hub

Building

Gym Management System

A full-stack gym management web app built with Python, Flask, and MySQL — handling member registration, subscription plans, and fee payment tracking with a Bootstrap-powered admin dashboard.

- > Member registration & subscription plans
- > Trainer assignment & daily check-ins
- > Automated renewal reminders module
- > Payment history & progress logs

Python

Flask

MySQL

Let's Connect

Open to internships, collaborations & opportunities

I'm actively looking for internship opportunities where I can contribute to real products, sharpen my engineering skills, and grow in a collaborative environment.
